

Jagdamba Engineering Works

INDUSTRIAL MACHINERY & MANUFACTURING SOLUTIONS

ABOUT THE COMPANY

Jagdamba Engineering Works is the flagship manufacturing company of JISK GROUP, specialising in the design, engineering and manufacture of industrial machinery, special purpose machines, production equipment, tooling, fixtures and turnkey manufacturing solutions.

Its customised engineering systems improve productivity, precision, automation and operational efficiency across railway, infrastructure, automotive, heavy-engineering and industrial applications.

BUSINESS FOCUS

- Industrial machinery manufacturing
- Auto hydro-copying turning machines
- Production-line development
- Special purpose machines (SPMs)
- Automatic CNC rod-cutting machines
- Industrial automation systems

Core capabilities

01 Industrial machinery manufacturing

02 Special purpose machines (SPMs)

03 Auto hydro-copying turning machines

04 Automatic CNC rod-cutting machines

05 Production-line development

06 Industrial automation systems

07 Tooling and fixtures

08 Precision fabrication

09 Plant-setup solutions

10 Turnkey manufacturing projects

11 Process engineering

12 Production engineering

INDUSTRIES SERVED

- Indian Railways and metro projects
- Automotive and heavy engineering
- Industrial manufacturing and OEMs
- Railway component manufacturers
- Steel, forging and foundry industries
- Testing laboratories and R&D organisations

Part of JISK GROUP's integrated ecosystem spanning manufacturing, testing technologies, engineering polymers, railway products and professional engineering consultancy.
