

# Kamakshi Track Fasteners

HIGH VISCOUS NYLON LINERS & RAILWAY POLYMER PRODUCTS

## ABOUT THE COMPANY

Kamakshi Track Fasteners is JISK GROUP's specialised manufacturing venture dedicated to High Viscous Nylon (HVN) liners for railway track-fastening systems.

The company combines advanced PA66 engineering polymers, precision injection moulding, material validation and quality-controlled production to deliver durable, high-performance railway polymer components.

## BUSINESS FOCUS

- High Viscous Nylon (HVN) liners
- Precision injection moulding
- Railway track-fastening polymer products
- Railway polymer components
- PA66-based engineering components
- Material validation and product testing

# Core capabilities

01 High Viscous Nylon (HVN) liners

02 Railway polymer components

03 Precision injection moulding

04 PA66-based engineering components

05 Railway track-fastening polymer products

06 Material validation and product testing

07 Customised HVN solutions

08 Quality-controlled manufacturing

## INDUSTRIES SERVED

- Indian Railways and metro projects
- Automotive and heavy engineering
- Industrial manufacturing and OEMs
- Railway component manufacturers
- Steel, forging and foundry industries
- Testing laboratories and R&D organisations

Part of JISK GROUP's integrated ecosystem spanning manufacturing, testing technologies, engineering polymers, railway products and professional engineering consultancy.
